TRADERS DEVELOP A FINE STREAK OF INCREDULITY.

Very Little Wheat News Gets a Hearing Outside of the Weather News, Which is Bad Enough to Satisfy the Thickest how "Total Failure" Reports are Offset by Sheer Doubts of Their Truth, and Calculations Based on Clearances, the Visible, and the Like.

Chleago, June 1.-Wheat showed an advance of 11/4 cents around the opening today, compared with yesterday's final sales, but lost % of it and closed % cent above Friday's close, Corn fluctuated within a range of % cent and closed with a gain of 14 cent. Oats are % cent higher and pork 12% cents

The most extraordinary weather ever known at this season of the year gave further evidence of its eccentricities between the close of yesterday's session and the opening this morning. Hotter than ever, dryer than face powher and a continuation of such conditions predicted for another forty-eight hours at the least. News of any de-scription other than that referring to the vagaries of the climate and their damaging effect upon the crop was very little regarded. "Total failure of wheat crop" was reported again and again from some of the best wheat rais ing counties in Illinois Indiana and damaging effect upon the crop was very little regarded. "Total failure of wheat crop" was reported again and again from some of the best wheat rais opened dull with prices unchanged to 5 cents decline without a sale on the call, make a some small gains in part of the list and missouri, and from Ohio and Michigan the reports were only a few degrees less alarming. That the market did not more fully respond to the disastrous news was owing to the fact that the majority of the traders refused to believe it. The price of July when the market opened, was anywhere from 794 to 794 cents, or about 1 cent per bushel higher than it closed yesterday. It kept within a range of 785 cents and 794 cents during the greater part of the session with quick recoverless to the session with quick recoverless to fit seems of the session with quick recoverless to fit seems of the session with quick recoverless to fit seems of the session with quick recoverless to fit session with quick recoverless to fit of the session with quick recoverless to fit of the fit o believe it. The price of July when the market opened, was anywhere from 1934 to 7915 cents, or about I cent per bushel higher than it closed yesterday. It kept within a range of 78% cents and 7915 cents during the greater part of the session with quick recoveries every time it got below 79 cents. The prediction of the signal service bureau in for fair and hot weather tonight and Sunday in Indiana, Illinois, upper and lower Michigan, Wisconsin, Missouri, Iowa, Kansas, Nebraska and Minnesota. With that before them the traders, although unbelievers in extensive crop damage, did not care to go home short. The following matters, bowever, prevented the believers in however, prevented the believers in crop damage of an unusual destruc-tiveness from becoming too enthusiastic on that account. The visible sup-ply is not expected to show more than from 1,000,000 to 1,500,000 bushels decre-ase, but the gueses this season are not very reliable. The week's clearances

of wheat and flour both coasts amount-ed 2,426,000 bushels compared with 2,854, 000 bushels the previous week. The shipments from Chicago for the week were 601,869 bushels, the noticeable fea-ture of which is that only 19,000 bushels of it was for points east of Toledo. Of the red winter wheat now in the vistthe red winter wheat now in the visible supply only 4,000,000 bushels is at points outside of Chicago and of that quantity 2,000,000 bushels is in New York. New York speculators were the sellers here today. They do not appear to be moved by the prospect of the red winter wheat in their elevators being at a premium over the hard. being at a premium over the hard spring they are now valuing so highly. The failure of the red winter wheat crop will certainly bring about the hange in prospective values suggested if it approaches the extent now pre-dicted for it. The price remained very steady and firm in the last 45 minutes

at around 7914 cents and that was the value at the end. value at the end.

The corn market was firmer and a little higher on account of the hot dry weather predicted for the forty-eight hours and the strength was not disturbed by any estimated heavy receipts, as for several days back. The prices paid at the opening of the market were the highest for the day and closing sales were at the bottom of the range and at ¼ cent above the latest quotations of the day before. July opened at 53 cents and closed worth 52% cents.

Only a fair business was transacted in oats. Orders were not very urgent and sellers did not seem over anxious to dispose of stuff. A firm feeling existed and values at the close were from % to % cent higher. The strength was due mainly to sympathy with wheat

The receipts of hogs were liberal, the quality poor and prices lower with a large supply estimated for the coming week. Fork was most affected, show-ing a loss of 20 cents at one time, but

Jake Timm Still Worrying Sam Butts
About That Bank Failure. The Mulvane Record mys: John Egner was arrested last Saturday for be ing implicated in sending threatening letters to Sam Butts. He made a statement to the officers in Weilington to the effect that Jake Timm and Abble Fruits were the authors of the let-ter, and that they asked him to mail it. And that he did mail it at Dalton, but did not know what the letter con-tained. On the strength of his confes-sion Jake Timm and Abble Fruits were arrested bust Tuesday and taken to Wellington. Som Butts has received arrested hast Tuesday and taken to Wellington. Sam Butts has received a number of threatening letters, supposed to be from the same parties, but this was worse than any of the preceding ones. It threatened to kill him, burn him out, etc. if he did not put up \$2,000 to pay John Timm, what he lost in the Warren bank failure. Threats have been made not only against Sam Butts, but against Robinson, Crum, Dick Warren, Gurtner and others.
